ABOUT ME

I'm a Computer Science and Design graduate with hands-on experience across frontend development, Python/Django, REST APIs, databases and UI/UX design. I enjoy understanding how users think, designing thoughtful interfaces around that in Figma, and then building them into fast, responsive and accessible web experiences. From creating clean, component-based UIs with HTML, CSS, JavaScript to developing robust backend logic, API integrations and database management with Django and MySQL, I like owning the full flow — from an idea and a wireframe to a working product that people actually enjoy using.

WORK EXPERIENCE

Web Development Intern **2025**

- Built responsive pages & mini-projects with HTML, CSS, JS
- Focused on clean UI & mobile responsiveness
- Received LOR for performance

Python Full Stack Intern **2025**

- Built web features using Python, Django, PHP & MySQL
- Created APIs & worked with Django ORM
- Worked in agile team on live tasks

UI/UX Design Intern **2025**

- Designed wireframes & prototypes in Figma
- Improved designs using user feedback
- Created clean, user-friendly interfaces

EDUCATION

VIMAL JYOTHI ENGINEERING COLLEGE
2022-2026

- B.Tech in Computer Science and Design

GOVT. BOYS HIGHER SECONDARY SCHOOL
2020-2026

- Higher Secondary Education

ST. BAKHITA ENGLISH MEDIUM HIGH SCHOOL
2020

- High School Education

CERTIFICATE

- Infosys Springboard Online-2025
  Certified in HTML, CSS, JavaScript, TypeScript and Angular.
- Foundations of User Experience (UX) Design– Google Online-2025

LANGUAGES

- Engilsh
- Hindi
- Malayalam
- Tamil

PROJECTS

Edge AI-Based Real-Time Birdsong Recognition System — **PYTHON, RASPBERRY PI**

- Developing real-time system to identify Indian birds by sound.
- Built offline Edge AI pipeline on Raspberry Pi for forest use.
- Created dataset pipeline from BirdCLEF/Xeno-canto with noise removal & spectrograms.

Aricircle – Social App for Agriculture — **FLUTTER, FIREBASE**

- Built social app for farmers to share updates & info.
- Designed responsive screens & reusable UI in Flutter.
- Worked in agile team on live tasks

Healthcare App UI - Appointment Booking Concept — **FIGMA**

- Concept focused on seniors & low-tech users.
- Covered research, pain points, booking flow, wireframes, UI & testing.
- Focus: readability, accessibility & low cognitive load.

E-commerce Website UI — **FIGMA**

- Designed homepage, product page & checkout flow.
- Focused on visual hierarchy, typography & color.
- Kept checkout path short & clear.

Frontend Mini Projects — **HTML, CSS, JS**

- Built responsive mini-projects during training
- Worked on layouts, interactive components & JS functionality.

CERTIFICATE

- **Frontend:** HTML, CSS, Bootstrap, JavaScript,Angular, TypeScript, React.js, Responsive Design, UI Integration
- **Backend:** PHP, CodeIgniter, Python, Django, Flask/FastAPI Basics, REST API Design,Express
- **Databases:** MySQL, SQL, Firebase
- **Tools:** Git, GitHub, VS Code, Postman
- **UI/UX:** Figma, Wireframing, Prototyping, User Flows, Usability Testing
- **Soft Skills:** Communication, Problem-solving, Time Management, Teamwork
